# THE DEPARTMENT WORKERS

Interesting Gossip Gleaned Among Employes of Government Bureaus.

#### INTEREST IN COTTON-PICKING MACHINES

No Gathering of the Crop by Monkeys This Year-Popular Patent Office Employes-Longest Decision on Record Just Rendered.

is printed the longest decision ever made in a patent case. It covers twenty-nine full decision is by Mr. Justice Brown and the dissenting opinion by Mr. Justice White.
The Carnegle corporation won. The suit

had been pending for several years and it was ably fought. Hon. Thomas B. Reed was of counsel for the plaintiff. metal and has become quite important in the business. The suit was for infringetinue to be of interest.

The attendants at the model room of the Patent Office in the old Postoffice building are often asked to be shown the models of of memory it is unique and is a very they used to have when they had less ex-

The models of the earlier machines were burned in the fire of 1874. The first ma-chine to be worked was used by a South Carolina planter named Richardson, who dahandoned it. The inventor was Charles
Mason, the inventor of the Mason telephone and the head of the company now turning them out.

The inventors of the machines were thrown into panic a few years ago by the rank "fake" of an Atlanta newspaper man who imagined a plantation in Mississippi where monkeys had been taught to pick cotton so well and at so little cost that the laborers and machines would never be in the competition. But even now the monkeys in the South belong mainly to the organ grinders and the cotton is still picked by hand.

Capt. William R. Ramsay, foreman of the specification division of the Printing Office, is an able man and a popular one. The specification room is under the jurisdiction of the Public Printer, and about 265 printers are employed. The work is intricate and important, and only under such expert supervision as Captain Ramsay is able to give can the work be carried on. The system of photographic reproduction is found in perfection in this

Captain Ramsay has been in the serv ice of the Government for several years. He was a civil war officer in an Ohio regiment. He is highly regarded by his fellow-craftsmen, who have repeatedly

Capt. Robert E. Grant, of Ohio, one of the clerks at the Patent Office, is a genial and able man, and is one of the "stand-bys" of the office. He-is noted for his in-terest in his fellow-workers. Captain Grant is from Missouri and is commander of Kit Carson Post, G. A. R.

The Government Printing Office organization of soldiers and sailors of the civil war was entertained by its lady friends Staturday night. The programme was largely musical. Among the guests were Rev. W. H. Milburn, chaplain of the thirty years of age, graduates of a repu-

Three old and honored employes of the hers of Kit Carson Post, G. A. R., and are visited by large numbers of their com-rades. They are John Bostick, and Ohio man, at the Pension Office; Major J. M. Emory, and Mr. Oscar C. Fox, of the Pat-ent Office. Mr. Bostick has nervous pros-

A former member of the Geological Survey, who has joined the rush toward the new-found gold fields of Idaho, for ences. which a Klondike future is predicted, in a letter to a friend in the Treasury Department, tells of the hardships of the dos, this letter is full of interest and gives a fair idea of what the fortune-

The former Government employe is one of a party who started from Weiser to Thunder Mountain with assurances from the unctuous hotelkeeper and outlitter that it was a pleasant little excursion of streen days. The letter was written on the twentieth day, when the party was still forty miles away, with a mountain intervening. They crossed numerous mountains covered with snow of terrifying depth and after going through a pleasant valley tackled another mountain, the trail seeming to lengthen the shole time. Half a day's travel caused them to gain an altitude of 8,000 feet. In six miles they descended 4,000 feet over More attention is now directed toward

Thunder Mountain than to any part of the mining world. The deposits are claimed to be very similar to those of

In the "Patent Record" this week there s printed the longest decision ever made n a natent case. It covers twenty-nine full days there has not been such excitement pages of the "Record" and it is set in small type. The decision is in the case of the Carnegie Steel Company, limited, vs. timited, vs. promised land. The inexperienced and trail are falling by the way, as always the Cambria Iron Company. The majority frail are falling by the way, as always Returning prospectors have not let up on the roseate pictures of the promise of

The party here alluded to went down ac mountainside in a most novel and ex-ti; manner. Wrapping pieces of can-as bout them, they simply turned loose was of counsel for the plaintiff.

The contest was over patent No. 404,414. issued June 4, 1889, to William B. Jones, who assigned it to the Carnegie Company. It was a device for mixing molten pig and the stirring scenes about them, they simply turned loos and slid down the six-mile incline with out mishap. Romance has not left this land yet and the stirring scenes about mining camps and boom towns will compared to the stirring scenes about the stirring sc out mishap. Romance has not left this land yet and the stirring scenes about

in the Census Bureau, recently won a wager in a remarkable manner. As a fea cotton-picking machines. A revival of the strong explanation of Mr. Langley's value industry of making machinery to do the as a clerk. To name on the briefest work of the negroes is feared. For the notice the appointees of a half dozen past few years the inventors have let this subject alone and there are a number of thousand appointments, and when there have been many changes and removals s a noteworthy achievement. Mr. Langey has done this.

A group of Representatives and Mr

Langley were talking and the clerk as serted he could name the appointees of each of them without making a mistake in a name. His proposition to do so, with a box of cigars as the prize, was readily taken up. Each Congressman had from one to four clerks remaining in the bureau and these the appointment clerk named without an error with the exception of one trifling mistake. There are about twenty Smiths in the bureau and in calling the name of a young lady he said Miss Ethel V., instead of Miss Ethel B. Smith. He got the cigars.

Capt. John S. Robinson, commanding ompany B of the District National Guard, rapidly recruiting his company. npany is part of the First Battalio and is known as the Printers' company, nearly all the members being employes of the Government Printing Office. The captain is a well-known printer and a fine military man.

Land Office reports are regarded as dry eading but occasionally there is some thing of passing interest to Eastern people in the returns from the Western offices. In a recent report from the office at Missoula, Mont., the following state-

ment appears:
"Anna J. Flaherty filed a timber and tone sworn statement to 160 acres of land in section 28 of township 14 north, of range 23 west."

Among the names of the people making

statements are those of Mrs. Flaherty, Maggie Davitt, and David D. O'Connell, which would indicate that out West as everywhere else, there is nothing too good for the Irish.

A board of officers will be convened to meet at the Marine Hospital Bureau, 3 B Street southeast, Washington, D. C., Monday, June 16, 1902, for the purpose of examining candidates for admission to the grade of assistant sugeon in the United States Marine Hospital Service. Canditable medical college, and must furnish testimonials from responsible persons as order of the examinations: First, physical; second, oral; third, written, and

fourth, clinical. The examinations are chiefly in writing, and begin with a short autobiography of and begin with a short autobiography of the candidate. The remainder of the written exercises consists in examination on the various branches of medicine sur gery, and hygiene. The oral examin includes subjects of preliminary e tion, history, literature, and natural sel-

#### STARTING UP A RED DEVIL. Smart Chauffeur Does the Trick Without

Getting Hands Greasy.

What the bicyclist with his wheel broken down was, in the day when wheels as those in which this automobilist was from business. were a greater novelty than they are here placed, but he nevertheless did preserve his equanimity admirably, keeping on trying to start the machine up with now, the chauffeur with a stalled auto is now, only more so; namely, a center of attraction.

When an auto breaks down on the pubit in numbers, to look upon the efforts of the navigator to start the machine going sgain, with an interest which it does not In this case the stalling occurred on an

uptown avenue much frequented by drivers, riders, and automobilers. namely, Seventh Avenue above the park; the machine being one of the red devil variety; long, low, and rakish; one of the kind with seats for four and having a sort of turtle back on top at the forward end.

This turtle back or shell it seems in hinged across at the back, so that it can hinged across at the back, so that it can active what to do, and he kept on at it

that the mechanism which it cenceals, when in place, can be got at close at hand and conveniently. The chauseur had the lid up now and was engaged in trying to

had an end on it like a valve stem, so in a moment among the passers-by on the that you could put a wrench on it, and sidewalk .- New York Sun.

deliberation.

and start that cylinder turning. The cylinder had a motion of its own when it had been once started, but it didn't keep it up; it would go for a half a turn or so further than it had actually been the continuous forms of t thrown by the crank, and then stop again but that what was wanted was to make it keep agoing was apparent from the fact that while it was going the machine

up like the lid of a box, in ordes with untiring repetition of effort; and

make the red devil's insides buzz as they ought to, while a thick ring of curious got his hands greasy in starting it up.

And now he shut down the turtle back Plumb in the center of the carmine demon's vitals, revealed by the hfting of the turtle back, there was something apparently of iron and about the size of an oyster keg. It had running through or a spring or two somewhere and bethe center of it, horizontally fore and aft, a spindle. The forward end of this spindle, projecting through the forward end of the case containing the machinery, and the running through the running through the running through the running of people that had stood around it melting away new, to be lost

## AGRICULTURE IN HAWAII.

Census Bureau Makes Public Statistics for the Islands

The Census Office yesterday issued a bulletin giving the statistics of agriculture for the territory of Hawaii. In part the bulletin says:

"The farms of Hawaii, June 1, 1900 numbered 2,273, and were valued at \$60, 29,956. Of this amount \$3,545,895, or 5.5 per cent, represents the value of build-ings, and \$56,484,061, or 94.1 per cent, the value of land and improvements other than uildings. On the same date the value of farm implements and machinery was \$11,484,896, and of live stock, \$2,570,142. These values, added to that of farms, give the 'total value of farm property,' \$74,-084,988, an average agricultural investment per inhabitant of \$481.07.

"The products derived from domestic animals, poultry, and bees, including animals sold and animals slaughtered on farms, are referred to in this bulletin as 'animal products.' The total value such products, together with the value represents the value of animal products, and \$21,417,516, or 97.2 per cent, the value of crops, including forest products cut cr produced on farms.'

#### STEAMER STRUCK BIG WHALE

Leviathan Was Killed and the Steamship Badly Injured.

TACOMA, Wash., May 20 .- Oriental adices contain details of a peculiar accilent which almost resulted in the sinkng of the British steamer Peluse while ound from Hongkong to Foochew with a cargo of oil. Twenty miles from Lyemun Pass she struck what was supposed to be ocks and returned to Hongkong for dry docking with a large hole in her hull. Subsequent developments show that she

id not hit the rocks, but instead struck speed. The leviathan was so badly injured period of the preceding year.

The continued growth in our that he died. His remains were found floating by natives and towed ashore by a Chinese junk.

On April 15 British Customs Officer stan 100 tons. Natives who were fishing observed the impact of the steamer and whale, though the captain of the Peluse did not know the details until informed by letter from Officer Arlington.

# DETECTIVE CHIEF DEAD.

Col. Thomas N. Boylan Passes Away in New Orleans.

NEW ORLEANS, May 20 .- Col. Thomas N. Boylan, chief of the Boylan private police and detective agency, died here last night as the result of an operation for appendicitis. Colonel Boylan was one of the best-known detectives and police officers in the South.

He was the Southern correspondent of Pinkerton's National Detective Agency, and commanded a force here of 400 or 500 men, policing all the banks and insur-He was sixty years old and a native of

INVENTOR BERNARD FOUND IN BUFFALO

Home for a Boat in Which to Sent Plunge Over Niagara Falls.

BUFFALO, May 20 .- George H. Bernard was taken to his home in Omaha, Neb., last night by two private detectives from that city. Bernard had been rooming at the Tifft House, and was an inventor of note some years ago. While here he talked incessantly of a boat he had invented to character. The following is the usual in which he could go over Niagara Falls. He sent for the boat a few days ago appeared two weeks ago. He was induced to go home by the statement that the boat had been injured.

### **OBITUARY NOTES.**

Col. Thomas N. Boylan, chief of the Boylan Private Police and Detective Agency, died in New Orleans last night according to their attainments on examination, and will be commissioned in one of the best-known detectives in the Thunder Mountain trail over which the army of the hopeful is now traveling. Like all reports from reputed El Dorados this letter is full of interest and the same order as vacancies occur. Open appointment the young officers are, as a paper of the property of the hopeful is now traveling. New York, New Orleans, Chicago, or San Francisco. and insurance companies. He was a native of New Orleans. He went on the New Orleans police force in 1854 and served until the outbreak of the civil war, when he worked in the Confederate secret serv ice. In 1874, when the popular uprising overthrew the Republican State governor, Boylan was appointed chief of police, and preserved order. When New Orleans was \$2,600, and surgeons \$2,500 a year. When taken possession of by Colonel (now genquarters are not provided commutation at the rate of \$30, \$40, and \$50 a month, according to grade, is allowed.

All grades above that of assistant surgeon receive longevity pay, 10 per centum the place of chief. He was appointed the place of chief. again when Governor Nicholls was in-agurated in 1877, and held the office until 1882, when he resigned to take charge of his own agency, which had the policing of all the banks and wharves.

Samuel Knox died last Sunday at the anon, N. J., at the age of eighty. He was that was what the chauffeur was doing at this particular juncture; what he was trying to do apparently being to make that iron cylinder turn on the spindle that served as its axis, and keep turning. It is no easy thing for a man to keep in the competition of t

Mrs. Patrick J. Tynan died on Sunday at her home, 1711A Bergen Street, Brooko hurry or fret, but with perfect easy lyn. ### THE ADDER MAKES A TRIP.

Initial Dives in Fresh Water Made Near

Mount Vernon. The submarine boat Adder, the first of her type about ready for the Government trials, yesterday made her first run since her arrival here. The little vessel left the navy yard in the morning, convoyed by the steam yacht Mindora and the tug D. M. Key, and proceeded under her own power to the course opposite Mount Verpower to the smoke that the spectators perceived the smoke that the smoke that the spectators perceived the smoke that the smoke that the smoke that the spectators perceived the smoke that trials, yesterday made her first run since power to the course opposite Mount Vernon, making the trip down the river of eighteen miles in about two hours. Upon arriving at the course the vessel was "trimmed" and went over the course sev home of his son, John H. Knox, at Leb- eral times, both on the surface and submerged.

The longest of the submerged runs was the second son of the Rev. Dr. John Knox, who was for forty years a minister of the Collegiate Dutch Church. For some years of them were fully a mile in length. Durabout a mile and one-half, while several ing the submerged, runs a number of short or porpoise dives were made, showing that the vessel could be as easily handled in fresh as in salt water. The runs were considered successfull in every way. Later in the week the boat will be taken to the urse for further trials.

FOURTEEN ACRES IN A DANCING FLOOR

World's Fair Contractor to Celebrate Its Completion With Ball for 100,ooo Dancers.

ST. LOUIS, May 20 .- The contractor who s building the Varied Industries Palace at the World's Fair has suggested the holding of a dancing carnival upon a mag nificent scale to celebrate the completic

of the floor of the building.

In the construction of these mammoth palaces the floors are built first and then the superstructures put in place. In the Varied Industries building the main floorarea is about fourteen acres.

area is about fourteen acres.

The contractor proposes to have a big brass band occupy a stand in the center of the floor and play tunes suitable for dancing while 100,000 dancers join in the pirouette. The contractor expresses th inion that he will have no trouble in securing permission from the director, the fair to carry out his carnival idea.

# SHADOW GAMES IN

Invention of M. Caran d'Ache, Famous Cartoonist.

Many Scenes of National Interest Projected Upon Screens in Most Life-Like Manner.

"People in this country are probably wholly unacquainted with a form of entertainment which is proving a great drawing card in Paris," said a gentleman who has lately returned from the gay metropolis of France.

"M. Caran d'Ache, the famous cartoon ist and illustrator, whose pictures in Figaro and other periodicals you have doubtless seen reproduced, got up a few years ago at the Theatre d'Application at Paris, a special representation of Chinese shadows which were devised by him. and are so superior to anything that has previously been done in this line that he has been able to call them 'French shadows,' in order to distinguish them from

imilar productions. "M. d'Ache takes pleasure in represent ing the military scenes of the first repubo British North America have increased lic and first empire. He projects upon year by year, and our total exports to the screen an entire army, wherein we see Napoleon the Great with his staff at different distances amid the ranks. The defiling of the troops is astonishing and one would think that he was present at a

"A Vision in the Steppes."

"He calls a series of pictures represent ng Napoleon's retreat from Moscow 'A titled the 'Return from the Woods' form a masterpiece as a whole, and the figure are so skillfully cut that the celebrities of the day who are seen passing in the Avenue des Acacias can be recognized The height of the figures is about eighteen

"I went behind the scenes to see how M d'Ache managed his marvelous shadow ipal exports from the United States to graphs. The silhouettes, after being com British North America during the nine posed and drawn, are cut out of sheet months ending with March, 1897 and 1902, zinc, which gives them great rigidity. The cutting is a very delicate operation and

requires great accuracy.
"Some figures, such as those of cavalrymen, hussars, and dragoons of the grand army, have apertures in certain parts, and behind these is pasted colored transpar-ent paper. In this way the black shad-ows that move along the screen have cer-tain parts in color, such as the plumes of the helmets and the horses' saddles. "A large number of the zinc silhouettes act through mechanism. At a grand review, to the order 'Carry arms,' all the guns are seen to rise in unison. The silhouette is provided with a series of guns properly arranged upon a rod, which is lowered br raised by the action of a lever.

To the Public:

It has become necessary to redecorate our store throughout, together with many

How Silhouettes Are Made. be brilliantly illuminated by an oxyhydrogen lamp, and, the light in the body of the theater being turned down, the silhouettes, in passing, project upon the screen a very strong shadow, which the spectators perceive, but which is not visible from the side scenes. Each silhouette is taken from a large box by a man, who places it in a groove at the bottom of the screen. Four or five operators suffice to keep the shadows succeeding one another without interruption.

"During the epopee one witnesses great combats, the capture of redoubts,

and terrible cannonading. Nothing is more amusing than the method of pro-ducing the effect of those epic contests. The cannons are provided with little mans that an operator fires, and, at the same moment, the big drum of the or-chestra imitates the noise of cannon, and a rattle of large size imitates the sound of the discharge of musketry. the smoke that the spectators perceive

#### MISS DANFORTH ENTERS PLEA OF NOT GUILTY

Committed Without Bail to Answer Mur-

der Charge. SOUTH FRAMINGHAM, Mass., May 20. -Miss Nina F. Dartorth, the dwarf who shot and killed her lover, Andrew J. Em-

ery, on Saturday night, was arraigned in

the district court yesterday on a charge

of murder.

The defendant was pale, and when the word "murder" came from the lips of the clerk she gulped down a big sob and her lips trembled. In a voice almost inaudible Miss Danforth entered a plea of "not guilty." Judge Kingsbury then said that the Government had asked for a continuance for two weeks, to which counsel fo defense nodded his assent. Clerk Ladd then read the order of the court that the woman be committed to jail at East Cambridge until June 2, without bail.

Danforth was visibly affected when she heard the order of the court committing The courtroom was filled to suffocation, nany of the spectators being women.

DOLPHIN READY FOR PRESIDENT'S VISIT

Dispatch Boat Goes to Annapolis for the French Ceremonies of Welcome.

ANNAPOLIS, May 20 .- The United States dispatch boat Dolphin arrived at Annapolis this morning and was at once put in communication with the superintendent of the Academy. The Dolphin will be at the disposal of the President and his party during his visit to Annapolis this week when the Gaulois with the commissioners from the French government comes to the Naval Academy, and will be used when the President makes an official return of the visit in conveying him from

# MINNESOTA AS AN AGRICULTURAL STATE

of Farm Work There.

Prosperity Marks Every Feature of the Record-Official Definitions of the Various Terms Employed.

The Census Office yesterday issued a

ulletin of the statistics of agriculture

in the State of Minnesota. A "farm," as defined by the Twelfth Census, includes all the land, under one management, used for raising crops and pasturing live stock, with the wood lots, swamps, meadows etc., connected therewith. It includes also the house in which the farmer resides, and all other buildings used by him in connection with his farming operations. The farms of Minnesota, June 1, 1900, umbered 154,659, and had a value of \$669,522,315. Of this amount \$110,220,415, or 16.5 per cent, represents the value of uildings, and \$559,301,900, or 83.5 per cent, the value of land and improvements other than buildings. On the same date the value of farm implements and machinery was \$30,099,230, and that of live stock,

of farm property. The products derived from domestic animals, poultry, and bees, including animals sold and animals slaughtered on farms, are referred to in this bulletin as "animal products." The total value of such products, together with the value of all crops, is termed "total value of farm products." This value for 1899 was \$161,-217,304, of which amount \$45,522,367, or 28.2 per cent, represents the value of animal products, and \$115,694,937, or 71.8 per cent, the value of crops, including forest products cut or produced on farms.

\$89,063,097. These values, added to that of farms, give \$788,684,642, the "total value

The "gross farm income" is obtained by deducting from the total value of farm products the value of the products fed to live stock on the farms of the producers. In 1899 the reported value of products fed was \$33,25,480, leaving \$127,959,824 as the gross farm income. The ratio which this latter amount bears to the "total value of farm property" is referred to in this bulletin as the "percentage of gross income upon investment." For Minnesota in 1899 it was 16.2 per cent,

ing fine polish, therefore, it is absolutely necessary to close them all out before the work can be done. Our loss will be your gain

We have many of the very best planos in America to select from. The following will give some idea as to how the goods are marked to sell:

Brand new cabinet grand pianos, best possible makes, with elegantly handcarved panels, patent soft stops, Boston fall board, duet desks, sell everywhere for \$350-\$475-will go at this sale for \$218 to \$298, on easy payments. Good upright pianos, in plain casings

with all improvements, worth \$275 to \$300, will close out at \$148 to \$188, on payments of \$10 cash and \$8 per month. One splendid used W. H. Ivers' upright piano, in good condition, worth \$225, will sell for \$115. One Haines Brothers' square piano

large size, full 7 1-3 octaves, thoroughly overhauled, worth \$150, will close out for One McPhail square piano, large size

good for practice work, worth \$125, will lose out for \$48. One second-hand Clough & Warren organ, parlor case, worth \$40, will sell for

One used Estey organ, parlor case, worth \$60, will close out for \$30. New Organs, sold everywhere for \$75 to \$85, will close out for \$48 to \$55, payable

\$6 cash and \$5 per month. Every piano and organ in the house is narked in plain figures, regardless of former prices, that will positively insure their sale in two weeks or less. Remember, the sale is now going on, and

the bargains are being taken rapidly. SMITH & YOUNG, 523 Eleventh st. nw.

# THE WHITE STAR STATUS.

Entrance of Company Into Merger Regarded as a Fact. LIVERPOOL, May 26.—The entrance of the White Star Steamship Company into

Census Office Bulletin Tells the Atlantic merger is now regarded as an accomplished fact. It is learned that of 250 shares the executors of T H. Ismay, the founder of the company, have 150, the Harland & Wolff Shipbuilding Company, including Mr. Pirric, the manager of the company, 87, while most of the remainder are held by parties in harmony with Mr. Pirrie.

It is understood that Bruce Ismay, who holds only ten shares, is an unwilling seller. His friends say they do not blame him, but blame the government, which left the shipowners to fight their battles alone while their foreign opponents were backed by foreign governments.
